

Above: custom table and seat designs presented to customer for pool area. Below: finished product.

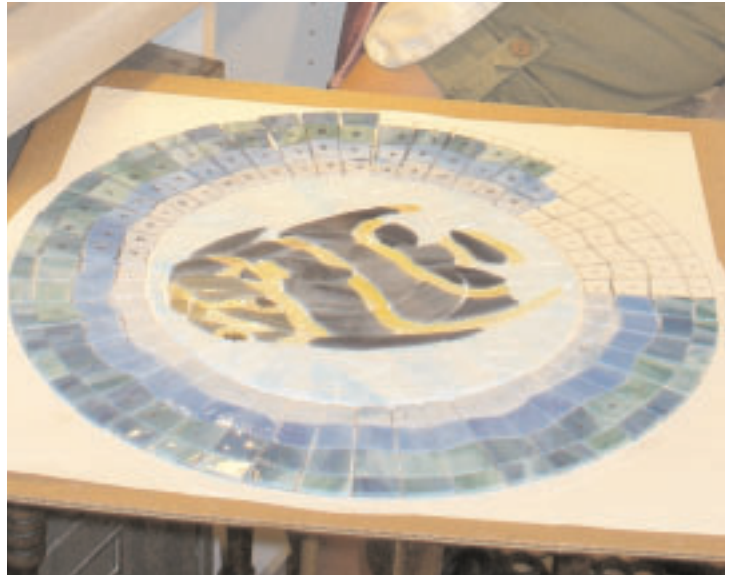

1. Once the design is done, a template is made.

2. Patterns are arranged onto sheet glass and cut.

3. Each piece is grinded to remove sharp edges.

4. The glass is carefully positioned and fitted.

5. Sections are secured with contact paper.

6. Patterns are inverted and adjusted for spacing.

7. Top sections of mortar is spread first.

8. Top sections are positioned and paper removed.

9. Pieces are checked for shifting and adjusted.

10. Sides are fitted and applied, piece by piece.

11. Grout is applied and glass is buffed clean.

12. This project took about a month to complete.
